

**UNIVERSAL PRESENTATION DEVICE****ABSTRACT OF THE DISCLOSURE**

A universal presentation device discloses having two or more presentation elements for use in environments such as presentation environments. For example, the  
5 universal presentation device may include a combination of a laser pointer element, a pointing device element, and/or a writing instrument element. The universal presentation device is dimensioned to house each element within a single logical housing. Further, each element is operable with any of the other elements present within the universal presentation device. A method of operating the universal presentation  
10 device, including its use environment, is also disclosed.
